Puntuación lograda

De 2008 a 2010: *"The number of titles **remained steady**" o "There was a **plateau** in his Grand Slam count".*

En 2011 y 2015: *"His success **peaked** during these years" o "There was a **sharp rise** in the total number of trophies".*

En 2017: *"A **slight dip** in performance occurred due to injuries" (aunque en el acumulado se ve como una línea plana).*

Tendencia general: *"The overall trend shows a **dramatic upward trajectory** over the two-decade period".*

Novak Djokovic – Graph Presentation Script

Introduction (0:00 – 0:30)

Good morning everyone. Today, I am going to analyze this line graph, which illustrates the upward trend of Novak Djokovic's Grand Slam titles from 2008 (two thousand eight) to 2026 (two thousand twenty-six).

As you can see on the horizontal axis, we have the timeline, while the vertical axis represents the cumulative number of trophies. Overall, the graph shows a dramatic increase over nearly two decades.

Body – Data Analysis (0:30 – 1:30)

Starting in 2008 (two thousand eight), the number of titles remained steady during the first few years. There was a plateau in his Grand Slam count between 2008 (two thousand eight) and 2010 (two thousand ten).

However, in 2011 (two thousand eleven) and again in 2015 (two thousand fifteen), there was a sharp rise in the total number of trophies. His success clearly peaked during these years, marking important turning points in his career.

Between 2012 (two thousand twelve) and 2016 (two thousand sixteen), the graph shows consistent growth with some moderate fluctuations. In 2017 (two thousand seventeen), a slight dip in performance occurred due to injuries, although the cumulative total remained relatively stable.

From 2018 (two thousand eighteen) to 2023 (two thousand twenty-three), the graph displays a strong upward trend. During this period, the total number of titles increased significantly, allowing him to reach a peak and strengthen his position as one of the greatest players in tennis history.

Conclusion (1:30 – 2:00)

In the final years, from 2024 (two thousand twenty-four) to 2026 (two thousand twenty-six), the figures appear to level off at 24 (twenty-four) titles. This stability suggests the consolidation of an extraordinary career.

In conclusion, the graph clearly demonstrates that Djokovic's career was characterized by steady growth, resilience, and long-term dominance.

Thank you for your attention. Does anyone have any questions?

Passive Voice

Novak Djokovic's success is supported by a strict routine in which yoga, stretching, tennis-specific drills, hydration, nutrition, and recovery methods are carefully combined. Great importance is given to physical preparation and flexibility, while recovery is supported through saunas, ice baths, and specialized hydration. In addition, mental focus is strengthened through gratitude and mindfulness, allowing high performance to be maintained at the top level of professional tennis.
